

For Immediate Release

New Venues for Vienna MIR PRO and Vienna Instruments

Vienna Symphonic Library's Introductory Offers in October 2015

Vienna, October 1, 2015 – The Vienna Symphonic Library team announces the release of *Vienna MIR RoomPack 5*, a collection of dedicated impulse responses for their Mixing and Reverberation Software *Vienna MIR PRO*, featuring the late gothic monastery church in Pernegg, Austria. *MIRx "The Sage Gateshead"* is a new convolution reverb extension for the company's software players *Vienna Instruments* and *Vienna Instruments PRO*, featuring UK's famous landmark building. Both new products are available separately or in Bundles. Customers benefit from special introductory prices through October 31, 2015.

Vienna MIR RoomPack 5 – Pernegg Monastery

Each *Vienna MIR RoomPack* comes with a collection of impulse responses, ready-to-use with Vienna's highly acclaimed **Multi Impulse Response** mixing and reverberation software *Vienna MIR PRO* and *MIR PRO 24*. The all-new *RoomPack 5* is dedicated to the late gothic monastery church of Pernegg, a small village situated in the north of the "Waldviertel" region (Forest Quarter) of Lower Austria, near the Czech border. The five-sided choir apse and the nave that is unencumbered by pillars notably contribute to its extraordinary acoustics. Almost 5,000 impulse responses (with an average length of 6 seconds) have been captured from four different microphone positions – near the center and in front of the altar, in the middle of the nave, and near the choir gallery in the back. Coinciding with the release of the new *RoomPack*, *Vienna MIR PRO* and *MIR PRO 24* have been updated and come with 125 new Character Presets for the company's recently released *Vienna Dimension Brass II* Collection. What's more, the new feature "Simulate Air Absorption" automatically dampens the higher frequencies of the direct signal in proportion to increasing distance from the audience. Registered users of the software may download the updated version at any time from www.vsl.co.at, free of charge.

Vienna MIRx – The Sage Gateshead

MIRx Reverb Mixing Extensions are a convenient and affordable way to integrate the stunning acoustics of renowned concert halls and sound stages directly into Vienna's proprietary software players *Vienna Instruments* and *Vienna Instruments PRO*. The UK's

landmark building “*The Sage Gateshead*” in the northeast of England accommodates a large concert hall with a spectacular wood-paneled auditorium and a seating capacity of up to 1,640 – an ideal venue for large orchestral performances. *MIRx The Sage Gateshead* comes with 360 individually handcrafted and masterfully pre-EQ'd presets for all available *Vienna Instruments* and ensembles that can be placed at their appropriate positions on stage, at the single touch of a button.

Introductory Offers

Customers benefit from special introductory prices during the month of October, 2015. *Vienna MIR RoomPack 5* is available for EUR95 (regularly EUR115), and *MIRx The Sage Gateshead* for EUR65 (regularly EUR79). Users with one or more registered *RoomPacks* or *MIRx* products receive additional Complementary Discounts when purchasing a *RoomPack Bundle* or a *MIRx Bundle*.

About the Vienna Symphonic Library

The Vienna Symphonic Library is an innovative, research-driven music software and sample library developer based in Vienna, Austria. The team continually strives to improve virtual orchestral music production with a special emphasis on authenticity and ease-of-use. ***Vienna Instruments***, the company's multi-award-winning virtual instruments in the formats AU, VST, AAX Native, and RTAS, encompass an exhaustive range of solo instruments and ensembles, from their flagship *Symphonic Cube* to special instruments such as the *Vienna Konzerthaus Organ*, the *Vienna Imperial* grand piano, saxophones, upright bass, and even distorted guitar. ***Vienna Instruments PRO*** is the most powerful software sample player on the market, providing Auto Humanization, Polyphonic Legato, Enveloped Time Stretching, Adjustable Tuning Scales as well as an internal Auto-Playback and Pattern Sequencer. ***Vienna MIR PRO*** and ***Vienna MIR PRO 24*** are network-capable mixing and reverberation solutions for Macs and PCs, based on Multi-Impulse Response convolution. ***Vienna Ensemble PRO 5*** is a universal mixing-host for stand-alone and cross-platform network applications with full parameter automation and 3rd party plug-in support. The ***Vienna Suite*** audio plug-ins encompass eleven high-end mixing and mastering tools, such as convolution reverb, hybrid reverb, equalizer and master equalizer, limiter and multiband limiter, compressor, exciter and others. More information on the company's products can be found at www.vsl.co.at.
