

Dear Vienna Newsletter Subscriber,

We're proud and happy to announce the release of two brand-new products.

[\*MIRx The Sage Gateshead\*](#) is a new convolution reverb extension for our software players *Vienna Instruments* and *Vienna Instruments PRO*, featuring UK's famous landmark concert hall. It comes with 360 individually handcrafted and masterfully pre-EQ'd presets for all available *Vienna Instruments* and ensembles that will be placed at their appropriate positions on stage – just at the touch of a button. Getting a perfectly balanced ambient sound has never been easier!

[\*Vienna MIR RoomPack 5\*](#) is dedicated to the superb acoustics of a late gothic monastery church in Pernegg, Austria, that was built in the early 1500s. Nearly 5,000 impulse responses have been captured from four different microphone positions, ready to use with our holistic **Multi Impulse Response** mixing and reverberation software *Vienna MIR PRO / MIR PRO 24*.

Please find more details about the new products and our special **Introductory Offers** through **October 31, 2015** [here](#).

---

## Software Update

What's more, *Vienna MIR PRO / MIR PRO 24* has just been updated! The new version comes with 125 additional Character Presets for *Vienna Dimension Brass II* (including up to seven individual settings per ensemble and even per instrument)! What's more, the new feature "Simulate Air Absorption" automatically lowers the treble of the direct signal with increasing distance to the audience. As a registered user of *Vienna MIR PRO / MIR PRO 24* you may download the updated version at any time from [MyVSL](#), free of charge!

---

## Student Discounts

We've extended our Student Offer with discounts up to 30% through **October 15, 2015**, by popular demand. Please find more details [here](#).
