VIENNA SYMPHONIC LIBRARY

Vienna Smart Orchestra – Orchestral Powerhouse at Your Fingertips

Vienna Symphonic Library's new library excels in the studio, live on stage, on the road.

Vienna, September 12, 2018 – The Vienna Symphonic Library is pleased to announce the release of *Vienna Smart Orchestra*, a complete and powerful, yet ressource-saving and reasonably priced symphonic package. The new library product offers a large orchestra and additional organic FX textures, mapped over the entire range of the keyboard. It comes with the new *Vienna Synchron Player* that lets users play all the main sections of the orchestra together or separately, with the possibility to add selected solo instruments. A convolution reverb, featuring the acoustics of *Synchron Stage Vienna* is integrated in the player's multi-channel mixer, resulting in a perfectly balanced sound right out of the box.

Large Orchestrations on the Fly

The *Vienna Smart Orchestra* is the perfect all-in-one tool for sketching symphonic ideas, delivering scores on deadlines, or playing live on stage. It provides a large, 140 piece orchestra with full dynamics, ready to play over the entire range of the keyboard. Users may create large orchestrations on the fly, without worrying about balancing and fine-tuning the instrumentation.

The main sections of the orchestra – strings, woodwinds, brass, mallets, drums and percussion – can be played separately or all together at once, with access to the multi-channel mixer to adjust the levels of each ensemble. In addition, selected solo instruments, such as flute, oboe, clarinet, French horn, trumpet or an ensemble of violins can be added over the accompanying orchestra played with the left hand. Customized layers such as subtle pianissimo string pads or fortissimo brass break-outs make it easy to find the right tone in a split second. The "marcato control" feature enables users to play everything from smooth legato lines to aggressive ostinatos in just one patch by simply moving a pre-configured fader. Last but not least, the included FX presets are a great source of inspiration and a treasure trove for creating all-new, hybrid soundscapes and organic textures.

Live on Stage, in the Studio, on the Road

With *Vienna Smart Orchestra*, the essence and power of a large symphonic orchestra is now instantly accessible in real-time. The resource-saving, affordable package provides perfectly balanced sonic results at any time right out of the box. The *Vienna Synchron Player*'s integrated multi-channel mixer offers a host of FX plug-ins, including a convolution reverb that features the exceptional acoustics of the company's refurbished *Synchron Stage Vienna* as well as an algorithmic reverb. A host of presets delivers ready-to-play set-ups for traditional orchestral applications as well as for experimental soundscapes.

Introductory Offer

Vienna Smart Orchestra is currently available at a special introductory price of €145 through September 30, 2018. Registered users of *Vienna Special Edition Vol. 1,* or of any Collections included with the *Symphonic Cube* (*Standard* or *Full Library*) receive a discount of €50, bringing the price down to €95 during September 2018.

About the Vienna Symphonic Library

The Vienna Symphonic Library is an innovative, research-driven music software and sample library developer based in Vienna, Austria. The team continually strives to improve virtual orchestral music production with a special emphasis on authenticity and ease-of-use. **Vienna Instruments**, the company's multi-award-winning virtual instruments in the formats AU, VST, and AAX Native, encompass an exhaustive range of solo instruments and ensembles, from their flagship *Symphonic Cube* to special instruments such as the *Vienna Konzerthaus Organ,* the *Vienna Imperial* grand piano, saxophones, upright bass, and even distorted guitar. Acclaimed software products include **Vienna Instruments Pro, Vienna Ensemble Pro, Vienna MIR Pro** and **Vienna Suite Pro**. In 2016, the company launched an entirely new venture: **Synchron Stage Vienna**, a unique scoring stage in Austria's capital that accommodates orchestras of up 130 musicians, merges proprietary software innovations and revolutionary approaches with traditional recording technologies and procedures.
