

For Immediate Release

Synchron Power Drums – Three Drum-Sets in One Exceptional Venue

Vienna Symphonic Library's Introductory Offer through December 5, 2018.

Vienna, November 30, 2018 – Vienna Symphonic Library just expanded their *Synchron Series* with three highly energetic drum kits: *Synchron Power Drums* includes one Sonor and two Tama drum kits that were recorded in *Synchron Stage Vienna's* main hall, a film music recording facility that ranks among the best scoring stages in the world. The product comes with a dedicated version of the company's free *Vienna Synchron Player* that comprises an exclusive selection of ready-to-use cinematic MIDI drum loops. Introductory offers at more than 40% off its regular price are available through December 5, 2018.

Three Drum Sets of Three Recording Eras

The three instruments represent the diverse sonic properties of different recording eras in order to provide a wide variety of energetic sounds. The versatile 1972 Tama Superstar on the right was made famous by artists such as Billy Cobham and Elvin Jones. The 1975 Sonor Acryl Champion Vintage Kit on the left was played by legends such as Ringo Starr, Karen Carpenter and Nick Mason. Positioned in the center is the 2017 version of the Tama Star, the manufacturer's current flagship line. Given this diverse setup, users have a wide variety of options, with the ability to play all three drum sets together or individually, both in their recorded positions or in a centered position.

Cinematic Sound with World-Class Ambience

All three drum kits were recorded for stereo and surround applications in *Synchron Stage Vienna's* 540 m² (5,813 sq.ft.) main hall, which ranks among the best scoring stages in the world due to its exceptional and unique acoustics. Since its grand reopening in 2016, various international film and TV scores, such as *Inferno*, *The Meg*, *The Girl in the Spider's Web*, *The Crown*, *Blue Planet II*, *Genius*, and many more have been recorded there. With this glorious ambience expertly recorded with the samples, users may choose from a menu of tailor-made

mixer presets – from clean to highly processed hits – to get their ultimate drum sound right out of the box. What’s more, with 19 microphones for each drum set and direct access to each instrument they may shape their individual drum and cymbal sounds using the full-blown mixer that’s integrated in the *Synchron Player*’s easy-to-use interface.

Highly Energetic, Multi-Player Drum Battles

The concept behind *Synchron Power Drums* is hard-hitting, energetic drum grooves played simultaneously on three independent yet interacting drum kits. An exclusive selection of intense cinematic drum loops is included, with complementary patterns in one MIDI file, ready to be played together or individually. To introduce slight inaccuracies and liveliness, the “Humanize Delay” parameter can be adjusted using MIDI automation.

Introductory Offers

Like most other products of Vienna’s *Synchron Series*, *Synchron Power Drums* is available in two versions. The *Standard Library* provides all samples and articulations for stereo applications, while the *Full Library* includes six additional surround mic signals. Both versions are currently offered at special introductory prices. *Synchron Power Drums Standard Library* is available at €145 (reg. €245), the *Full Library* is available at €225 (reg. €395) through December 5, 2018.

About the Vienna Symphonic Library

The Vienna Symphonic Library is an innovative, research-driven music software and sample library developer based in Vienna, Austria. The team continually strives to improve virtual orchestral music production with a special emphasis on authenticity and ease-of-use. ***Vienna Instruments***, the company’s multi-award-winning virtual instruments in the formats AU, VST, and AAX Native, encompass an exhaustive range of solo instruments and ensembles, from their flagship *Symphonic Cube* to special instruments such as the *Vienna Konzerthaus Organ*, the *Vienna Imperial* grand piano, saxophones, upright bass, and even distorted guitar. Acclaimed software products include ***Vienna Instruments Pro***, ***Vienna Ensemble Pro***, ***Vienna MIR Pro*** and ***Vienna Suite Pro***. In 2016, the company launched an entirely new venture: ***Synchron Stage Vienna***, a unique scoring stage in Austria’s capital that accommodates orchestras of up to 130 musicians, merges proprietary software innovations and revolutionary approaches with traditional recording technologies and procedures.
