Vienna Ensemble Pro 7 Now Available

Vienna Symphonic Library releases major update of their popular mixing host

Vienna, May 4, 2019 – The Vienna Symphonic Library announces the release of *Vienna Ensemble Pro 7*, a major update of their most popular cross-platform mixing and hosting application that easily connects multiple computers with simple ethernet cables, without the need of external MIDI or audio interfaces. Beyond a host of new features, the new software includes the massively expanded *Epic Orchestra 2.0*, a comprehensive 73 GB bonus library powered by the company's new *Synchron Player*. *Vienna Ensemble Pro 7* is currently available at an introductory price of €145 (reg. €195). Registered users of previous versions *Vienna Ensemble Pro 4*, *5* and *6* benefit from considerably reduced upgrade prices.

The Magnificent Seven

Since its first release in fall 2009, *Vienna Ensemble Pro* has become the definitive cross-platform network solution in studios and production facilities around the world, enabling users to set up multiple computer networks with both Macs and PCs, without the need of external MIDI and audio interfaces. The intelligent "Preserve" function is a huge time saver and lets users disconnect the software from the DAW when switching from one project to another, while keeping all plug-ins and samples loaded. The new version 7 comes with various onboard plug-in effects such as equalizer, compressor, limiter, exciter, analyzer as well as surround-specific plug-ins (up to 7.1), such as Surround Balance Pro, Surround Pan Pro, and Matrix Mixer Pro. Based on the company's high-end audio processing tools of *Vienna Suite Pro*, these powerful plug-ins are directly embedded in the mixer channels and include hundreds of production-ready presets for all kinds of mixing situations.

Single Licenses available

Users may purchase as many single licenses of *Vienna Ensemble Pro 7* as they need. Instead of buying a fixed bundle of three licenses, it's now possible to buy one, two, three or more licenses, depending on the number of computers on the network.

Wide Variety of Improvements

New features include simplified automation as well as a slew of interface improvements such as real-time readouts of CPU usage per instance, MIDI and audio activity buttons for every instance, and mini GUI displays of the integrated FX plug-ins right in the channel view. Both plug-in handling and the plug-in scanning process have been significantly improved. The auto populate feature displays the most frequently used effects and instrument plug-ins that can be enabled or disabled one-by-one, for AU and VST formats separately. Complete instances and folders can now be enabled or disabled, even using automation from within the DAW. Users of large setups will appreciate the new instance overview options with tabbed or vertical views, as well as the option of copying and pasting channels in order to quickly pull channels from existing templates. A feature currently in beta is AU3 compatibility, letting users access up to 48 MIDI ports per instance. With up to 768 MIDI channels per instance, *Vienna Ensemble Pro 7* is the first AU3 plug-in host on the market. Another beta feature is the compatibility with Montreal Music Lab's upcoming VM1 app, a powerful iPad controller for *Vienna Ensemble Pro 7.*

Massively Expanded: Epic Orchestra 2.0

Vienna Ensemble Pro 7 comes with the massively expanded *Epic Orchestra 2.0*, a powerful bonus library that offers large ensembles from the company's *VI Series* libraries, such as *Fanfare Trumpets*, *Epic Horns*, *Appassionata Strings* and *Woodwind Ensembles*. New additions to *Epic Orchestra 2.0* include a wide variety of instruments from Vienna's latest releases, such as *Synchron Strings*, *Synchron FX Strings*, *Synchron Percussion*, *Synchron Power Drums*, *Vienna Smart Spheres* and the *SYNCHRON-ized* product series. With a data size of 73 GB, the new *Epic Orchestra 2.0* is ten times the size of the original version that was included with previous versions of *Vienna Ensemble Pro*. All samples of *Epic Orchestra 2.0* have been re-edited and mapped for the company's new *Synchron Player,* and enhanced with the integrated convolution reverb featuring customized impulses from *Synchron Stage Vienna.*

Introductory Offers through May 16, 2019

A single license of *Vienna Ensemble Pro 7* is currently available at a special introductory price of €145 (reg. €195) and includes the free *Epic Orchestra 2.0*. The upgrade price for users of previous versions of *Vienna Ensemble Pro* is €75 (reg. €95) during the introductory period. Additional licenses are available at €65 (reg. €95), the reduced upgrade price for additional licenses is €45 (reg. €65). What's more, the new *Epic Orchestra 2.0* may also be purchased

separately for €105, without purchasing *Vienna Ensemble Pro 7*.

About the Vienna Symphonic Library

The Vienna Symphonic Library is an innovative, research-driven music software and sample library developer based in Vienna, Austria. The team continually strives to improve virtual orchestral music production with a special emphasis on authenticity and ease-of-use. *Vienna Instruments*, the company's multi-award-winning virtual instruments in the formats AU, VST, and AAX Native, encompass an exhaustive range of solo instruments and ensembles, from their flagship *Symphonic Cube* to special instruments such as the *Vienna Konzerthaus Organ,* the *Vienna Imperial* grand piano, saxophones, upright bass, and even distorted guitar. Acclaimed software products include **Vienna Instruments Pro, Vienna Ensemble Pro, Vienna MIR Pro** and **Vienna Suite Pro**. In 2016, the company launched an entirely new venture: **Synchron Stage Vienna**, a unique scoring stage in Austria's capital that accommodates orchestras of up 130 musicians, merges proprietary software innovations and revolutionary approaches with traditional recording technologies and procedures.
