DID YOU KNOW?

Your Basket as a Calculator

You may **use your basket as a calculator** to help you plan your purchases and forecast your upgrade discounts accurately. After you've logged in at www.vsl.co.at, you can add one or more items to your basket even if you don't want to purchase them immediately.

For pricing purposes, the products in your basket are treated as "registered" products, resulting in discounts towards other products, e.g. a product bundle. You may try out various options – **your personal savings are visible along with the price when you click on the Info button next to "Your Price"**. The discounted pricing you will see is based on the products you have really registered plus the products currently in your basket. You may remove items from "MyBasket" manually, and all items will also be automatically removed by quitting your browser application or by logging out.
