

Dear ...,

Celebrate with us!

New: SYNCHRON-ized Harps

This Collection offers two beautiful instruments based on our VI Collection Harps that were re-edited, updated and optimized for the Vienna Synchron Player. All articulations such as single notes, glissandos and arpeggios are perfectly organized and easily accessible in the Synchron Player's color-coded articulation structure. Both harps are perfectly positioned at the virtual Synchron Stage Vienna, utilizing the Synchron Player's convolution reverb based on Vienna MIR technology.

Benefit from the introductory offer and **crossgrade** from the VI Harps Full Library **for only €25!**

Vienna Synchron Player supports Apple Silicon

We're starting our rollout of software products that run natively on Apple Silicon. The first updated application is the Vienna Synchron Player whose new engine benefits users on all platforms, not just on Silicon. Enjoy **faster loading times and major performance improvements**, e.g., for libraries that use impulse responses like our SYNCHRON-ized Collections, especially SYNCHRON-ized Dimension Strings and Dimension Brass. Download the free update using your Vienna Assistant.
