

Dear ...,

Unite the best of both worlds!

Synchron Duality Strings comprises **two string ensembles** that were recorded at once, performing in separate rooms at Synchron Stage Vienna. The large ensemble played in the famous main hall, Stage A, delivering a full, more symphonic sound. The smaller ensemble was recorded in the relatively dry Stage B to provide a transparent and clear tonality that adds a certain polish when blended with the larger group.

Both ensembles played simultaneously, performing all articulations in perfect sync. Together they deliver a magnificent sound with unprecedented flexibility and countless expressive possibilities, from intimate intensity to passionate power, and everything in between – all in one easy to use player instance.

Would you like the first violins to sound crispier in your arrangement, without losing their breadth and depth? **Just raise the faders and balance the sound** of your 14 violin players in Stage A with the 8 violins from Stage B!

Be inspired by the new possibilities of this unprecedented recording approach – delivering two ensembles for one limitless experience!

### Introducing Duality Strings

Follow Paul into the world of Duality Strings, the results are breathtaking! Incredibly flexible in both sound and usability, and with an enormous wealth of articulations. Enjoy!

### What is String Duality?

String duality is a class of symmetries in physics that link different string theories - theories which assume that the fundamental building blocks of the universe are strings.

Best wishes from Vienna,  
Your Vienna Symphonic Library Team
