

Dear ...,

Multiply your possibilities of instrumentation!

NEW: Synchron Duality Strings (sordino)

Sordinos massively expand the sound palette of string instruments, as the great orchestrators and composers have impressively demonstrated since the end of the 19th century.

Continuing in the vein of our Duality principle, each sordino articulation was recorded immediately after its non-sordino counterpart for **coherent and beautiful performances**. Consequently all the articulations of Duality Strings (regular) are also available with Duality Strings (sordino), except for snap pizzicato.

Indulge in the world of beautiful velvety timbres bursting with variety!

SPECIAL OFFER: Synchron Duality Strings (regular)

Unite the best of both worlds with two string ensembles that were recorded at once, performing in separate rooms at Synchron Stage Vienna. The large ensemble played in the famous main hall, Stage A, delivering a full, more symphonic sound. The smaller ensemble was recorded in the relatively dry Stage B to provide a transparent and clear tonality that adds a certain polish when blended with the larger group. Get inspired by the new possibilities of this unprecedented recording approach!

To accompany the new sordino recordings, the first installment Synchron Duality Strings (regular) is available again at the **original introductory price!**
