

Dear ...,

We're excited to announce the next installment of our Synchron Duality Strings series featuring flautando and ponticello styles!

### New: Duality Strings (colors)

Each section of a string ensemble is capable of producing a kaleidoscope of colors and timbres that can paint evocative and transcendent musical landscapes. This third pack of Synchron Duality Strings offers the main articulations of the series in especially soft as well as eerie, glassy tonal colors, depending on where the players put the bow on the strings. Listen to these special performances that were played either close to the fingerboard in pianississimo (**flautando**) or close to the bridge (**ponticello**)!

**2+1 FREE!** Purchase Duality Strings (regular) and Duality Strings (sordino) to receive **Duality Strings (colors) for free**, only during the promotional period!

**Vienna tip: Use free Vienna Vouchers to save on Duality Strings!**

### Steve Jablonsky on Synchron Brass (Transformers, Gears of War, Desperate Housewives)

"Synchron Brass has very quickly become one of my favorite orchestral libraries, I wish I had discovered it sooner. The sound quality is truly amazing, the musicians and the Synchron stage are clearly world class. But for me what sets this library apart is the dynamic range. Dynamics put emotion into your music. Synchron can be big and powerful when I need it to, but it also delivers beautiful soft dynamics. Play a gentle lyrical line on any of the instruments and it feels like the musicians are right there in front of you. I am super impressed and very thankful for Synchron Brass. This library is a dream to compose with."
